Request your **FREE** copy of Keithley's Switching Handbook.
Visit www.keithley.com/at/306.

The 5th edition of Keithley's *Switching Handbook: A Guide to Signal Switching in Automated Test Systems* discusses the fundamentals of the switching function in test and measurement. Other topics include:

- Switching components
- Specifications and models
- Issues in switch system design
- Switching considerations by signal type
- Hardware implementation
- Applications

The handbook also offers a glossary, hardware selector guides, and notes on safety considerations.

If you prefer, request your **free** copy by calling
1-800-588-9238 (US only).

Equipto Electronics

351 Woodlawn Ave
Aurora IL 60506
T: 800-204-7225
F: 630-897-5314

Electronics packaging protection from earthquakes and other threats

Equipto Electronics Corporation®

351 Woodlawn Ave., Aurora, IL 60506-9988 U.S.A.,
Tel: 800-204-7225, 630-859-7840
Fax: 630-897-5314, Web: www.equiptoelec.com,
e-mail: info@equiptoelec.com

When the ground starts to shake, you don't want to worry about the shock and vibration resistance of the enclosure for your electronics system.

With our Heavy Duty line of seismic hardened electronic cabinets, you can meet such stringent requirements as:

- NEBS TR 63 for Zone 4
- Mil-Spec 810 and 901
- FCC/VDE, EMP/TEMPEST
- Protection against dust, shock and vibration
- Exceptionally high EMI/RFI attenuation
- Shielded I/O access and air filtering
- ISO standards 9001:2000

To assist you, our experienced enclosure engineers are available for free consultations. We can also provide a typical enclosure for engineering evaluation, even destructive testing. Available, too, is documented proof and information to properly load our enclosures for your own seismic or other testing. And when you're ready to order, we can preassemble your enclosure so all you need to do is load and ship.

For personal assistance, engineering assistance, or a catalog, call us today at 800-204-7225. Or, visit our Web site.

True Speed-Ability!

To keep up with your application use the world's fastest position sensors – TLM.

A magnetostrictive sensor is only as fast as the rate it makes data available at its output. Novotechnik's TLM is the fastest magnetostrictive position sensor with true 16 KHz data output that backs up the unlimited speed you can move the position marker at.

The TLM series features absolute linearity of $\leq \pm 30 \mu\text{m}$ in both SSI and 48-bit DyMoS digital output modes over full stroke lengths. Resolution is $\leq 5 \mu\text{m}$. Analog output modes the TLM series offers include 0 to 10 V, 10 to 0 V, 0 and 4 to 20 mA. Stroke lengths are from 100 to 4500 mm.

Call today or visit our Web site for specs with completeness and clarity that leaves the guesswork of other manufacturers behind.

Finally, a formula that works!

The world's best PCB online service
from quote to delivery (Q2D)

- Q Easiest online quote** and order for 2-6 layer quickturn proto boards
- 2 24/7/365 customer service** and design checks on demand, backed by 30+ years of experience
- d You get high quality PCBs** with the best on-time delivery in the industry

Come visit us today and check out
our online facilities built with the
design engineer in mind
